

## CRIMP RING REMOVER WERMA CR1800

With a simple handgrip the CR1800 presses the sleeve away from the hose and and coupling. The coupling is completely undamaged in the process and can be reused. With the CR1800 in combination with the Werma CM3000 the number of damaged couplings minimizes associated with repressing of fire hoses.

### Technical data:

- 220V socket
- can handle all normal sizes of fire hose, 25 – 76 mm
- safe for the operator with two-hand grip and protective door
- it is delivered with two dimensions of sleeves, free of choice.
